Luxury

Ornamental

Sophistication

Opulent

Enrich (Indulge + Elevate)

Enrich is the quest for opulence and richly decorative elements, like dressing for the occasion in fashion. It suggests rich and decorative elements that blend cultural references with past and future. Classic and sophisticated patterns team up with rich and metallic hues of gold, brass and gun metal with deep colours such as plum and carmine red.

With India's royal and cultural heritage, Indian manufacturers have no dearth of inspirations and materials to create stories in ultimate luxury and sophistication.

Green obsession

Nourish (Quest + Ex)

Designers and Researchers are always using the fusion of sustainability and designs giving birth to versatility in architecture where the beauty of handicraft is highlighted. The main focus is on greenery and environmental elements such as earth, stone, deep browns and greys.

Keeping these elements in mind, Indian designers blend traditional craftsmanship with contemporary designs to create the products inspired by the theme.

Energise (On+Exploration)

Digitalisation has entered into the physical world shaping immaterial forms and giving dynamic shapes. Energise connects everyone to technology by bringing new levels of energy with different colour palettes in fluorescents, bright and contrast shades.

The trend brings sporty designs and patterns in the most colourful and energetic way.

With its high connection with information technology, India can feel the vibrancy of this energy.
